

Code; Without Barriers Hackathon Registration

Technology continues to have a growing impact on every person and organization. Yet gender and minority gaps continue to exist in the tech industry, limiting the potential for more inclusive innovations. To drive a change, Microsoft in collaboration with iTrain Asia and Girls in Tech APAC is launching its Code; Without Barriers Hackathon program to foster more diversity and inclusion in the developer community and beyond. A month long Hackathon for women in Asia Pacific region that will upskill them and ultimately gain hands-on experience solving real-life problems that matter globally. The Hackathon is supported by Code; Without Barriers partner companies. The program provides a platform to enable female developers, coders, and other technical talent to contribute towards inclusive economic growth, encourage innovation and better reflect the societal makeup of their region. This is an individual hackathon and no teams are required.
